Concentration in General Human Development and Family Studies

The general HDFS concentration provides a flexible program for students interested in preparing for professional work or further study related to children and families through course work only (there is no internship requirement). This program of study is especially relevant for students who would like to pursue advanced course work in preparation for professional degrees (e.g., medical school). Other students who might find this option appropriate include students who wish to double major within four years, or students who for family or employment reasons find a semester-long internship a particular hardship.
